

Mimalite

Mimalite Oriented Wrapping Film

Reliable Performance

Secure and controlled wrapping reduces the risk of accidents and damage to load

User Friendly

Light-weight rolls improve security and enhances packaging

Consistent Performance

Uniform wrapping quality ensures load security at optimized cost

Reduced Consumption

Pre-Stretch reduces the film consumption per load resulting in lesser plastic waste

Mimalite

Oriented Wrapping Film

Mimalite Oriented Wrapping Film is the ideal solution for ensuring stability of palletized or unitized loads and facilitating safer loading, transportation and unloading. It can be used for both manual and machine applications.

Features and benefits

■ Maximum Protection

Mimalite has the highest retention and restoring forces which ensure better load protection in transit. It is one of the best methods to stabilize mixed load pallets.

■ Operating Efficiency

Mimalite film does not require any stretching while applying on the product. This, along with its reduced roll weight leads to lesser operator fatigue.

■ Cost Effective

It is one of the most economical packaging material for wrapping individual cartons and palletized loads. Innovative wrapping reduces quantity of film required, hence a significant reduction in the wrapping cost.

Mimalite Technical Specifications

Size	Grade	Width	Thickness	Roll Length	Net Roll Weight	Core Width	Core ID
		(mm)	(micron)	(Meter)	(Kg)	(mm)	(mm)
9 X 500	Machine	500	9	2000	8.72	520	76
9 X 500	Machine	500	9	1600	6.98	520	76
9 X 500	Hand	500	9	500	2.18	520	50
9 X 430	Hand	430	9	500	1.88	450	50
9 X 210	Machine	210	9	1620	3	230	76
7 X 430	Hand	430	7	600	1.78	450	50

1. Tolerance: Thickness +/- 1 micron, Weight +/- 5%

2. All sizes of mimalite are available in OXO-Biodegradable grade as well
