

Resilex

Resilex Surface Protection

High Strength

High tensile strength and optimum elongation ensure maximum protection

Increased Safety

Eliminates hazards associated with handling of alternatives such as wood and GP sheets

Branding

Provision for printing logos elevates branding

Optimized Cost

Economic method of surface protection as compared to alternatives

Resilex

Surface Protection

Signode's Resilex is a single category extruded polymer material with single/double/triple layers of corrugated/non-corrugated sheets. It is an ideal solution for surface protection. Available in both roll form as well as sheet form, it can be used for a wide range of applications

Features and benefits

■ Maximum Protection

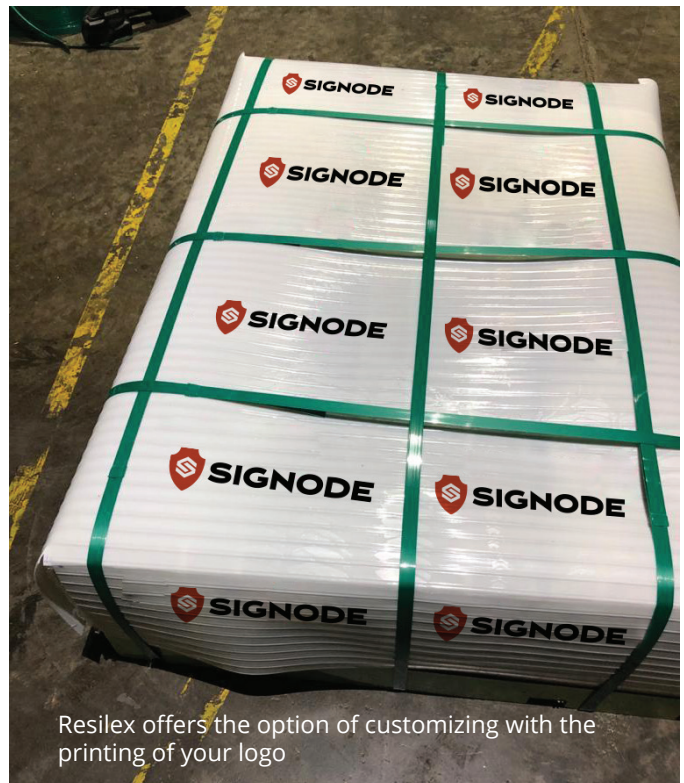

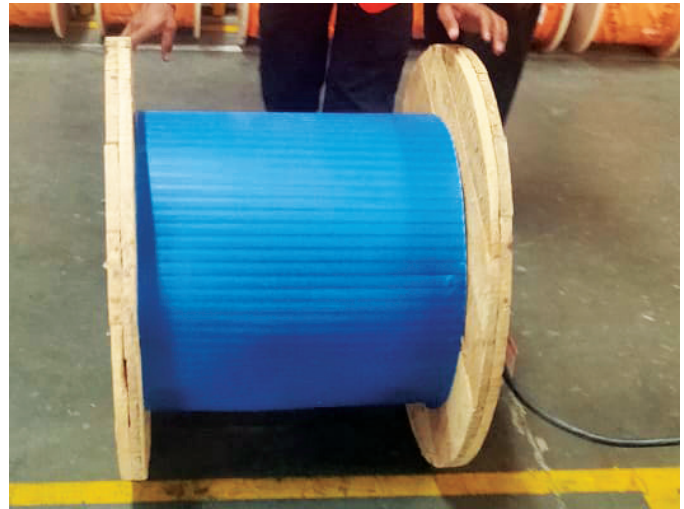

Manufactured with a high tensile strength and relevant suitable elongation, it ensures protection of your product. It also has a high dart impact strength which ensures protection against material handling and compression from external objects.

■ Improved Productivity

Resilex being a plastic based product is easy to pack as well as unpack thereby improving productivity.

■ Sustainable

It can be either be re-used or recycled to ensure reduced packaging footprint.

Resilex offers the option of customizing with the printing of your logo
