

# world class | shrink wrap

## Automatic L-Sealer with Heat Shrink Tunnel

For higher speed applications we offer a range of Automatic L-Sealers providing excellent performance and value for money. The complete system consists of a Fully-Automatic L-Sealing machine and Heat Shrink Tunnel with shrink wrapping speeds of up to 25 bags per minute. An automatic conveyor feeds the product into the film. The machine then measures the length of the product to allow the sealing jaws to operate automatically to produce the sealed bag. The film, which is trimmed off during the packaging process, is automatically wound up on the waste film take-up reel. It is then automatically conveyed into the high capacity Heat Shrink Tunnel for excellent shrink results all around the package.

## features & benefits

- Increase Storage Space
- Protects Merchandise from Damage
- Increase Marketing with Shrink Wrap
- Provides a Cost Efficient Option
- Utilize Unique Packaging Options

# technical parameters

	<b>PKN4522C</b>
<b>Power Supply</b>	380V 50/60HZ
<b>Power</b>	12 KW
<b>Size of Shrink Oven</b>	1200 x 450 x 220 mm
<b>Conveying Speed</b>	0-10m/min (Adjustable)
<b>Conveying Weight</b>	30 Kg
<b>Material</b>	PVC POF PP
<b>Dimensions</b>	1600 x 700 x 137 mm
<b>Machine Weight (kg)</b>	160

	<b>PKN450 Shrink Tunnel</b>
<b>Power Supply</b>	220V 50/60HZ
<b>Power</b>	1.35 KW
<b>Highest Packaging</b>	140 mm
<b>Seal Tangent Size</b>	560 x 440 mm
<b>Production Capacity</b>	15-30 bags/min
<b>Air Pressure</b>	0.5 Mpa
<b>Dimensions</b>	1650 x 920 x 1450 mm
<b>Machine Weight (kg)</b>	300
